

Προδιαγραφές προϊόντος

- 1) **Υλικό:** 100% βαμβάκι, 21s νήματα
- 2) **Μέγεθος:** 60 x 120 cm, 70 x 140 cm, 30 * 60'''', 80 x 160 cm, 100 x 180 cm, κλπ.
- 3) **Βάρος:** 350-450 gsm
- 4) **ΜΟQ:** 500pcs/design

Λεπτομέρειες συσκευασίας

- 1) **1 pc / polybag, 20-50 τεμ / κουτί** (Μπορούμε επίσης πακέτο πετσέτες σας ως ειδική απαίτηση σας)
- 2) **Μέγεθος χαρτοκιβωτίων:** 54 * 40 * 44 εκατοστά (κατά προσέγγιση)
- 3) **N.N.:** περίπου 15,0 κιλά
- 4) **G.W.:** 17,0 κιλά
- 5) **1 * 20 ft:** 15000pcs
- 6) **1 * 40 ft:** 32000pcs

OEM είναι ευπρόσδεκτη

Χαρακτηριστικά

- 1) Εξαιρετικά μαλακό, πολύ άνετα, μεγάλη απορρόφηση του νερού, καλή αντοχή.
- 2) Eco-friendly, αζωχρώματα δωρεάν, χωρίς κάδμιο, αντι-ωίδιο τελικού
- 3) Γνωρίστε ΕΕ και των ΗΠΑ κλωστοϋφαντουργίας πρότυπα.
- 4) Διάφορα σχέδια της βαμβακερή πετσέτα με διαφορετικά μεγέθη, χρώματα και το πάχος, όλα με togood την ποιότητα και την reπαράλογων τιμών
- 5) Τέχνη και Τέχνη: Ζακάρ, Κεντήματα, Reactive PTυπωμένο

Σχετικά με εμάς

We are one of the largest professional light textile manufacturers in China at present. Our factory have been producing all kinds of towels more than 10 years, όπως το μωρό πάνες, κουβέρτες, κλινოსκεπάσματα και ούτω καθεξής.

Τα κύρια προϊόντα μας είναι οι εξής:

Abstract

Background: The purpose of this study was to determine the prevalence of self-reported mental health problems in a community sample of young adults and to examine the association between self-reported mental health problems and self-reported substance use.

Methods: A cross-sectional survey of 1,000 young adults (ages 18-25) was conducted. The survey included questions about self-reported mental health problems (depression, anxiety, and stress) and self-reported substance use (alcohol, tobacco, and drugs).

Results: The prevalence of self-reported mental health problems was 25.3%. The prevalence of self-reported substance use was 38.7%. There was a significant positive association between self-reported mental health problems and self-reported substance use ($p < 0.001$).

Conclusion: The results of this study suggest that self-reported mental health problems are associated with self-reported substance use in young adults.

Keywords: mental health, substance use, young adults, prevalence, association.

Background: Mental health problems are a leading cause of disability and illness worldwide. In the United States, approximately 26% of the population has a mental health problem [1]. Substance use is also a leading cause of disability and illness. In the United States, approximately 38% of the population uses substances [2]. There is a strong association between mental health problems and substance use. People with mental health problems are more likely to use substances, and people who use substances are more likely to have mental health problems [3].

Methods: A cross-sectional survey of 1,000 young adults (ages 18-25) was conducted. The survey included questions about self-reported mental health problems (depression, anxiety, and stress) and self-reported substance use (alcohol, tobacco, and drugs). The survey was conducted online and was anonymous. The response rate was 65.3%.

Results: The prevalence of self-reported mental health problems was 25.3%. The prevalence of self-reported substance use was 38.7%. There was a significant positive association between self-reported mental health problems and self-reported substance use ($p < 0.001$).

Conclusion: The results of this study suggest that self-reported mental health problems are associated with self-reported substance use in young adults.

Keywords: mental health, substance use, young adults, prevalence, association.
