Ideal for removing dust and fingerprint smudges!

A Microfiber cloth, with all its millions of edges, holds dirt and dust particles very well. The most common type of screen cleaning is dust and oily fingerprints. This cloth does both of these very well. Microfiber has an affinity for oils and is able to wick up oily fingerprints from a screen surface, usually without additional cleaners. In addition, these cloths hold onto dust particles and don't just push them around.

Wring out and hang to dry in a few hours

The 80% Polyester 20% Polyamide weave gives strength, durability and comfort

We recommend using a high quality microfiber screen cloth without any type of additional cleaner for everyday screen cleaning. For more stubborn or streaky screen films, dried on dirt spots and/or stains, use the same microfiber screen cloth sprayed with a high quality cleaning solution to dissolve dirt so that it can be absorbed by the cloth.

Microfiber is environmentally friendly by saving on disposable products and cleaners. This top quality cloth is great for screen cleaning, lenses and glass. This cloth can be washed and reused many times.
