

Технические характеристики

- 1) **Материал:** 100% хлопок, 21s пряжи
- 2) **Размер:** 60 x 120 см, 70 x 140 см, 30" * 60", 80 x 160 см, 100 x 180 см, и т.д.
- 3) **Вес:** 350-450 GSM
- 4) **МОQ:** 500pcs/design

Детали упаковки

- 1) **1 шт / полиэтиленовый пакет, 20-50 шт / коробка** (Мы можем также упаковать свои полотенца, как вашему специальному требованию)
- 2) **Размер коробки:** 54 * 40 * 44 см (приблизительно)
- 3) **N.W.:** около 15,0 кг
- 4) **G.W.:** 17.0 кг
- 5) **1 * 20 футов:** 15000pcs
- 6) **1 * 40 футов:** 32000pcs

ОЕМ приветствуется

Особенности

- 1) Очень мягкий, супер удобная, большое водопоглощение, хорошо устойчивость.
- 2) Экологичные, Азо бесплатно, без кадмия, анти-плесени отделкой
- 3) Знакомства ЕС и США стандарты текстильные.
- 4) Различные конструкции из хлопка полотенце с различными размерами, цвета и толщины, все с togood качество и REASONABLE цена
- 5) Искусство и ремесел: Жаккард, вышивка, реактивная Printed

О нас

We are one of the largest professional light textile manufacturers in China at present. Our factory have been producing all kinds of towels more than 10 years, таких как ребенок подгузники, одеяла, комплекты постельных принадлежностей и так далее.

Нашей основной продукцией являются следующие:

- (1) Полотенца для кухни номере: Велюр реактивной печатных кухонное полотенце, кухонное полотенце, духовка рукавица, держатель горшок, фартук и т.д.
- (2) Полотенца для летнего сезона: Велюр реактивной печатных полотенце, пляжное полотенце мешок, игра полотенце, набор пляжное полотенце и т.д.
- (3) **Полотенца для ванной комнаты:** Вымойте ткань, лицо полотенце, полотенце, цокольный полотенце, купальные халаты, и т.д.

Abstract

Background: The purpose of this study was to determine the prevalence of self-reported depression in a sample of young adults and to examine the association between self-reported depression and self-reported health status, self-reported stress, and self-reported life satisfaction.

Methods: A cross-sectional survey of 1,000 young adults (ages 18–25) was conducted. The survey included questions about self-reported depression, self-reported health status, self-reported stress, and self-reported life satisfaction. The prevalence of self-reported depression was determined, and the association between self-reported depression and self-reported health status, self-reported stress, and self-reported life satisfaction was examined using logistic regression.

Results: The prevalence of self-reported depression was 12.5%. Self-reported depression was significantly associated with self-reported health status, self-reported stress, and self-reported life satisfaction. Specifically, individuals who reported depression were more likely to report poor health status, high stress, and low life satisfaction.

Conclusion: The results of this study suggest that self-reported depression is a common condition among young adults and is associated with poor health status, high stress, and low life satisfaction. Further research is needed to explore the underlying mechanisms of these associations and to develop interventions to improve the mental health of young adults.

Keywords: Depression, Young adults, Self-reported health status, Self-reported stress, Self-reported life satisfaction.
